

ACTION ON WATER

Water is the main ingredient in our products and essential to our manufacturing processes. To ensure a sustainable supply of water, we're working to reduce the amount of water we use in our operations and protect local water sources for future generations.

In many of our territories, water resources are affected by over exploitation, poor water management and the impacts of climate change. Water scarcity and deteriorating water quality in our supply chain have become major issues for all businesses in Western Europe. Around 80% of the total water footprint of our products comes from our agricultural supply chain, including sugar beet – which is grown in Western Europe – or the fruit juices we source from around the world.

As a result, we're taking a value chain approach to handling water with the care that it deserves. We're aiming to reduce the water we use in our manufacturing sites by 20% by 2025, as well as addressing water impacts within our supply chain. We're also aiming to replenish 100% of the water we use in areas of water stress through community based partnerships.

Our Action on Water helps to support [UN Sustainable Development Goal 6](#) on Clean Water and Sanitation.

We'll protect the sustainability of the water sources we use for future generations.

We'll reduce the water we use in manufacturing by 20% – and address water impacts in our supply chain.⁴

We'll replenish 100% of the water we use in areas of water stress.

**Baseline is 2010
and target date
is 2025 unless
otherwise stated**

⁴ Water use ratio, litres of water per litre of finished product produced.
