

# ACTION ON SOCIETY: OUR COMMUNITIES

## **We're determined to make a positive difference in society by promoting economic development in our local communities.**

We have always been closely connected to the local communities in which we operate, whether it's through our local production sites, the drivers who deliver our products or the employees who make and sell our drinks.

We also know that many of our communities face significant challenges, including high levels of youth unemployment. We help address these issues across our territories by increasing our employee volunteering and by supporting local community partnerships, with a particular focus on initiatives which help young people gain the employability, skills and confidence they need to succeed.

Our Action on Society supports the [UN Sustainable Development Goal 4](#), for inclusive and equitable quality education, the [UN Sustainable Development Goal 8](#) on Decent Work and Economic Growth and the [UN Sustainable Development Goal 11](#), by contributing to making the communities in which we operate more inclusive and sustainable.

---

We'll expand the contribution we make to society by increasing our employee volunteering and supporting local community partnerships.

---

We'll support initiatives which help young people gain the employability, skills and confidence they need to succeed.

**Baseline is 2010 and target date is 2025 unless otherwise stated**
