

RESPONSIBLE SOURCING

100% of the sugar we use is certified under either Bonsucro or Smartcane BMP & over 90% of suppliers (by share of spend) were assessed using responsible sourcing assessments.

We spend over A\$1.4 million with social enterprise suppliers.

SUSTAINABLE WATER FOR ALL & 100% REPLENISHMENT

We source our water and bottle it locally to minimise its environmental impact. We also conduct Source Assessments for our water sources including the mineral water we use & prepare Management Plans to ensure the ongoing sustainability of those sources for all users. With The Coca-Cola Company, we return to nature over three times the amount of water we use in our drinks.

100% RENEWABLE ELECTRICITY BY 2025 & NET ZERO CARBON BY 2040

We are investing in wind & solar projects including on-site solar. By the end of 2021, we aim to use over 40% renewable electricity in Australia. Our target is to reach 100% by 2025. This will help us achieve our objective to reduce our direct carbon emissions to zero by 2040 with a 25% reduction compared to 2015 being planned by 2030.

OPERATIONAL EFFICIENCY

We benchmark & set goals for:

- energy
- water
- greenhouse gas emissions
- operational waste

We also invest in more efficient equipment, buildings, vehicles, while continuously improving metering & monitoring to drive improvements.

REDUCING OUR LOGISTICS FOOTPRINT

Working closely with logistics providers, we pilot feasibility studies for sustainable logistical solutions (including green hydrogen), while improving the efficiency of our deliveries via a new Transport Management System.

100% HYBRID VEHICLES FOR OUR SALES TEAM

We are moving all the vehicles used by our sales teams to hybrid models & will continue to explore ways to minimise our fleet emissions.

100% RECYCLED PLASTIC IN ALL SINGLE-SERVE BOTTLES & PLASTIC CUPS

Leading on technical innovation to more than double our use of recycled plastic over the last 2 years, we now have all our bottles under 1L made from 100% recycled plastic. And recently moved to recycled plastic for our post-mix cups & no longer supply plastic straws.

HELPING OUR CUSTOMERS REDUCE EMISSIONS

We are reducing our carbon footprint including working closely with our suppliers to achieve Net Zero by 2040. To assist our customers energy use we provide the most efficient new fridges and vending machines, aiming to also achieve Net Zero for our equipment over the next few decades.

CREATING A CIRCULAR ECONOMY FOR PET IN THE BEVERAGES INDUSTRY

Simultaneously, we're also investing in a cutting-edge plastic recycling facility right here in Australia. This ensures that we are using more locally processed recycled content for the production of our bottles in Australia.

INVESTING IN COMMUNITIES

Together with our partners at Coca-Cola South Pacific, we invest over A\$1Million annually in community projects and partnerships through the Coca-Cola Australia Foundation.

LEADING & INVESTING IN COLLECTION & RECYCLING

Playing a leadership role in closing the loop on our packaging, we operate & coordinate all container deposit schemes currently running in Australia. This includes over 40 years of operations in South Australia.

CONSUMER WELLBEING & 25% SUGAR REDUCTION BY 2025

We've committed to the goal of reduce our portfolio sugar grams per 100mL by 25% by 2025, compared to 2015. In doing so, we have already achieved an 16% reduction at the end of 2020 & have wellbeing initiatives in remote Indigenous communities in respectful collaboration with our 134 retail partners and their communities. Since 2015, this work has delivered a 23% decrease in average weighted sugar per 100mL.
