

OUR CONTRIBUTION TO THE UN SUSTAINABLE DEVELOPMENT GOALS

Our sustainability action plan, *This is Forward*¹, is our way of defining the role we can play in supporting the UN Sustainable Development Goals (SDGs), which provide the global roadmap for sustainable development. Our strategy is closely aligned with the SDGs, with each of the commitment areas supporting one or more of the goals.

Commitment area	Contribution	SDGs
Forward on Drinks	Our Forward on Drinks commitments support SDG 3 , ensuring good health and wellbeing. By reducing the sugar in our drinks and evolving our recipes and portfolio to offer a greater choice of no and low calorie options, we're making a contribution to the global fight against obesity.	
Forward on Packaging	Our Forward on Packaging commitments support SDG 12 , ensuring sustainable consumption by helping to substantially reduce waste generation through waste reduction, recycling and reuse and SDG 14 , to protect and sustainably use the oceans, seas and marine resources.	 
Forward on Society	Our Forward on Society commitments support SDG 11 , by contributing to making the communities in which we operate more inclusive and sustainable. Through this work, we also support SDG 1 no poverty, SDG 4 inclusive and equitable quality education, SDG 5 gender equality, SDG 6 by contributing to global efforts to protect the future sustainability of our water resources, SDG 8 improving access to employment and work, SDG 12 responsible consumption and production; and SDG 17 partnerships and sustainable development.	       
Forward on Water	Our Forward on Water commitments support SDG 6 , by contributing to global efforts to protect the future sustainability of our water resources.	
Forward on Climate	Our Forward on Climate commitments support SDG 7 and SDG 13 . We are committed to playing our part in global efforts to tackle climate change, in line with the 2015 Paris Climate Agreement.	 
Forward on Supply Chain	Our Forward on Supply Chain commitments support SDG 2 , by promoting the development of sustainable agriculture, the SDG 8 , by seeking to protect labour and human rights, and eradicate forced labour and modern slavery within our supply chain and SDG 10 , reducing inequality within countries.	  

1. This is Forward relates to our activities in Europe. In May 2021, Coca-Cola European Partners completed the acquisition of Coca-Cola Amatil, becoming Coca-Cola Europacific Partners (CCEP). We are working to update our sustainability action plan targets to cover our combined business, including Australia, the Pacific and Indonesia (API), by the end of 2022.
