

Our 2023 Packaging Footprint

This graphic represents the number of packages introduced across Coca-Cola Europacific Partners (CCEP) markets* in 2023 by package type. It is based on individual units of packaging sold. In 2023 we introduced approximately 35 billion packs into the marketplace of which almost 4 billion were refillable bottles (PET plastic and glass). In addition, our fountain and dispensed equipment served over 3.3 billion drinks, based on 500mL servings.

2023 Sustainability Group Data
Information about our packaging footprint by total weight of material we use is available in our 2023 Sustainability Group Data report

*Does not yet include the Philippines

Percentage of packaging footprint includes dispensed drinks based on 500mL serving
